Professional Summary

B.Tech CSE (Artificial Intelligence) graduate, GHRCE Nagpur (June 2026, CGPA 8.09/10). End-to-end technical builder with production experience across ML engineering, data analytics, and GenAI: real-time ETL pipelines at **50,000+ records/day (35% latency reduction)**, VLM-powered surveillance (Gemini API), CNN medical image classifiers, Isolation Forest financial anomaly detection, and interactive BI dashboards (Power BI, Looker, Tableau). Advanced SQL practitioner with **99.9% data integrity** delivery at Trust Fintech. Verified **100th-percentile** problem solver — **perfect 600/600 on SIG CodeSignal**. Strong across the full data lifecycle: ingestion, feature engineering, model training, dashboard delivery, and containerised deployment (Docker/K8s).

Technical Skills

ML / AI / GenAI: PyTorch, TensorFlow, Keras, Scikit-Learn, OpenCV, CNN, Isolation Forest, Image Segmentation, NLP, LLMs, VLMs (Gemini API), Prompt Engineering, Random Forest, Agentic AI

Data Analytics & Stats: EDA, Statistical Inference, Threshold Backtesting, Regression Modelling, Anomaly Detection, Pandas, NumPy, Geospatial Heatmaps, Advanced MS Excel (Pivot, INDEX/MATCH, XLOOKUP, MIS)

Data Engineering: ETL/ELT Pipelines, Apache Airflow, Apache Beam, GCP DataProc, DataFlow, Batch & Real-Time Ingestion, Feature Engineering, Workflow Automation, Microsoft Power Platform

Databases & Cloud: PostgreSQL, MySQL, Snowflake, GCP BigQuery, GCP BigTable, Google Cloud Platform, Cloud Storage, Query Optimisation, Schema Design, Data Quality Management

Visualisation & BI: Power BI (DAX), Looker Studio, Tableau, Apache Superset, Sigma, Astrato, Chart.js, Drill-Down Dashboards, Direct-Query Metrics

Dev & MLOps: Python, Flask, REST APIs, Django, Next.js, React, Docker, Kubernetes (K8s), Microservices, Unit/Integration/UAT/Performance Testing, Agile, DevOps

Soft Skills: Analytical Thinking, Communication Skills, Collaboration & Teamwork, Adaptability & Learning Agility, Problem-Solving Mindset, Attention to Detail

Experience

Data Science & Quantitative Intern

Dec 2025 – June 2026

Trust Fintech Limited, Nagpur, India

- ▶ Deployed Python ML validation and ETL pipelines ingesting **50,000+ daily multi-source transaction records**, reducing operational latency by **35%** with zero data-quality flags across all pipeline runs.
- ▶ Maintained **99.9% data integrity** across PostgreSQL/MySQL schemas for transaction auditing; engineered high-efficiency SQL queries, ran stress and performance testing on high-density commercial logs.
- ▶ Constructed interactive Power BI dashboards and scheduled validation routines; translated complex financial data into actionable operational and strategic metrics for cross-functional engineering and business teams.

Projects

AML-Sentinel-AI: Anomaly Detection Engine *Python · Scikit-Learn · Isolation Forest · Pandas · Geospatial Viz*

[↗ GitHub](#)

- ▶ End-to-end unsupervised ML pipeline using Isolation Forest on multi-dimensional transaction vectors for financial crime detection; logarithmic geospatial heatmaps normalise global risk intensity; statistical threshold backtesting minimised false-positive compliance flags and improved data trust.

CampusEYE: AI-Augmented Surveillance Platform *Django · Next.js · Kubernetes · Gemini VLM · OpenCV · REST APIs*

[↗ GitHub](#)

- ▶ Deployed multi-modal VLMs (Gemini API) converting live video streams into structured text narratives; containerised microservices on Kubernetes with automated unit/integration testing achieved **20% faster object classification**; full-stack campus management platform with real-time alert pipelines.

Dynamic Pricing Simulator — Retail Analytics *Python · Flask · Random Forest · Pandas · SQL · Chart.js*

[↗ GitHub](#)

- ▶ AI-powered retail pricing platform using Random Forest to model demand, revenue, and profit across 20+ product categories; Flask REST backend with interactive Chart.js demand/profit visualisations; live deployed on Render; validation **RMSE 13.36**.

Education

B.Tech, Computer Science & Engineering (Artificial Intelligence)

June 2026

G.H. Rasoni College of Engineering (GHRCE), Nagpur

CGPA: 8.09/10

Achievements & Certifications

★ **SIG CodeSignal 600/600** : Perfect score validating elite algorithmic reasoning and data structures.

Oracle OCI 2025 AI Foundations Associate (Sept 2025)

Codecademy Professional CS (DSA, Algorithms, Databases; Aug 2025) **Python 3 · Power BI**

IIT Bombay PostgreSQL (85%) · PHP & MySQL (75%)

Citi Tech - Forage (2026) · Goldman Sachs - Forage (2026) · Deloitte Tech - Forage (2025)
